Update: COVID-19 and Vaccination Roll-out

Dr S Kariem

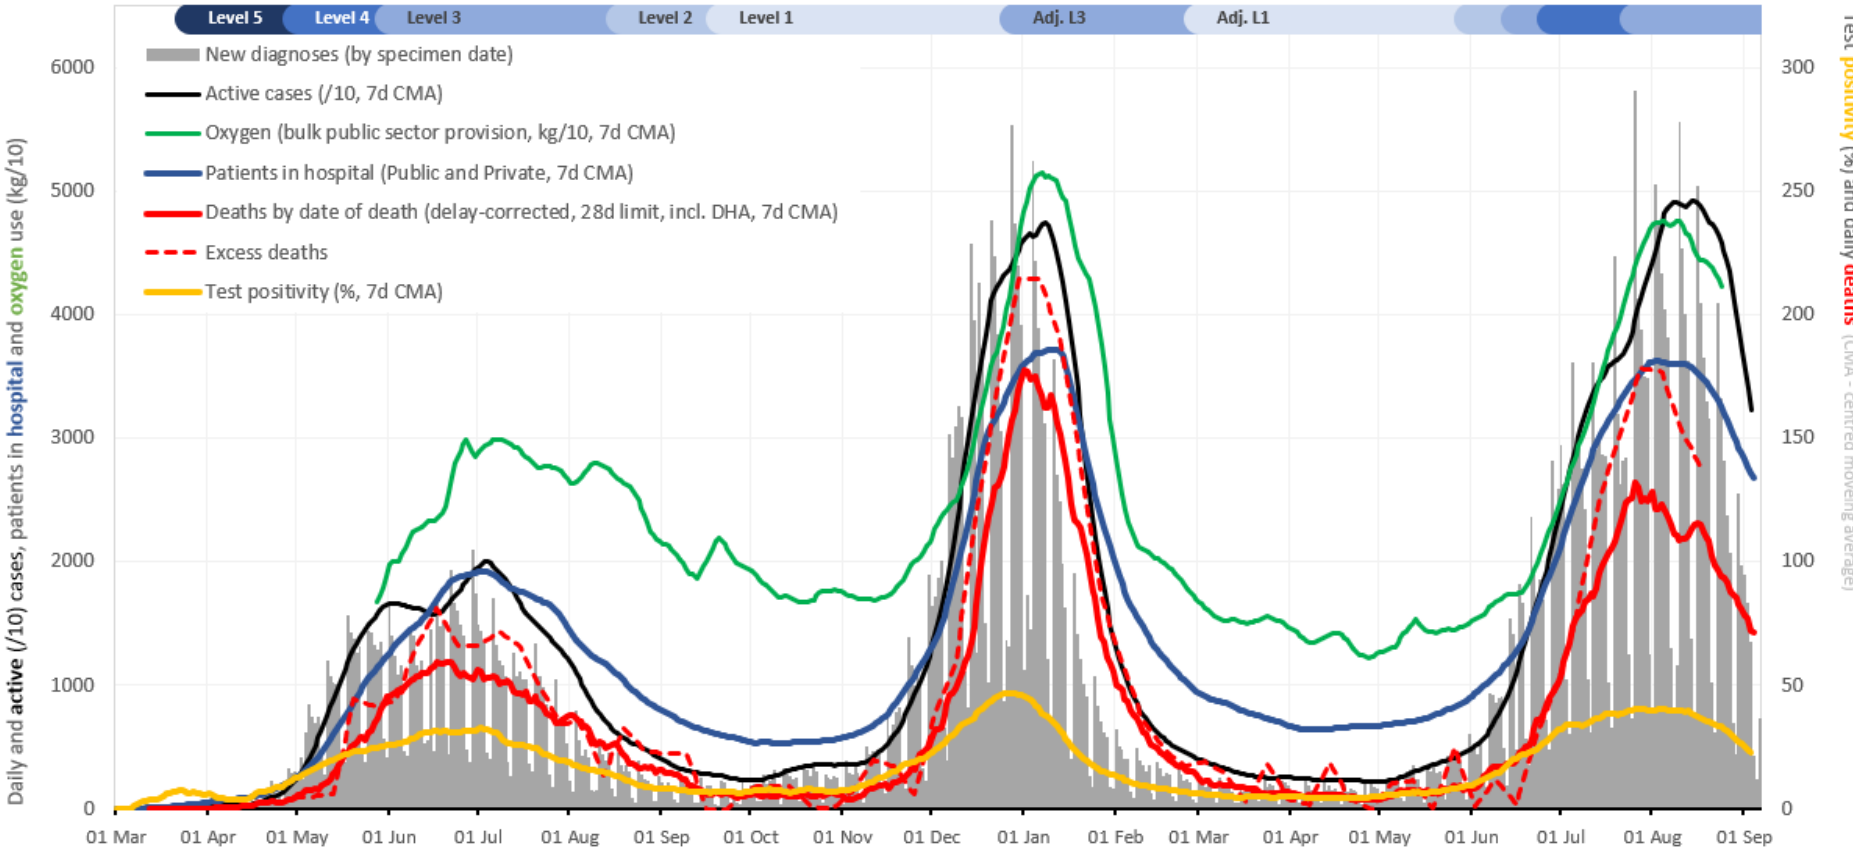

9 September 2021

Overview

1. Surveillance & Response Update
2. Expectations for the 3rd wave
3. The triggered third wave response
4. Vaccine Implementation update & effectiveness
5. Conclusions

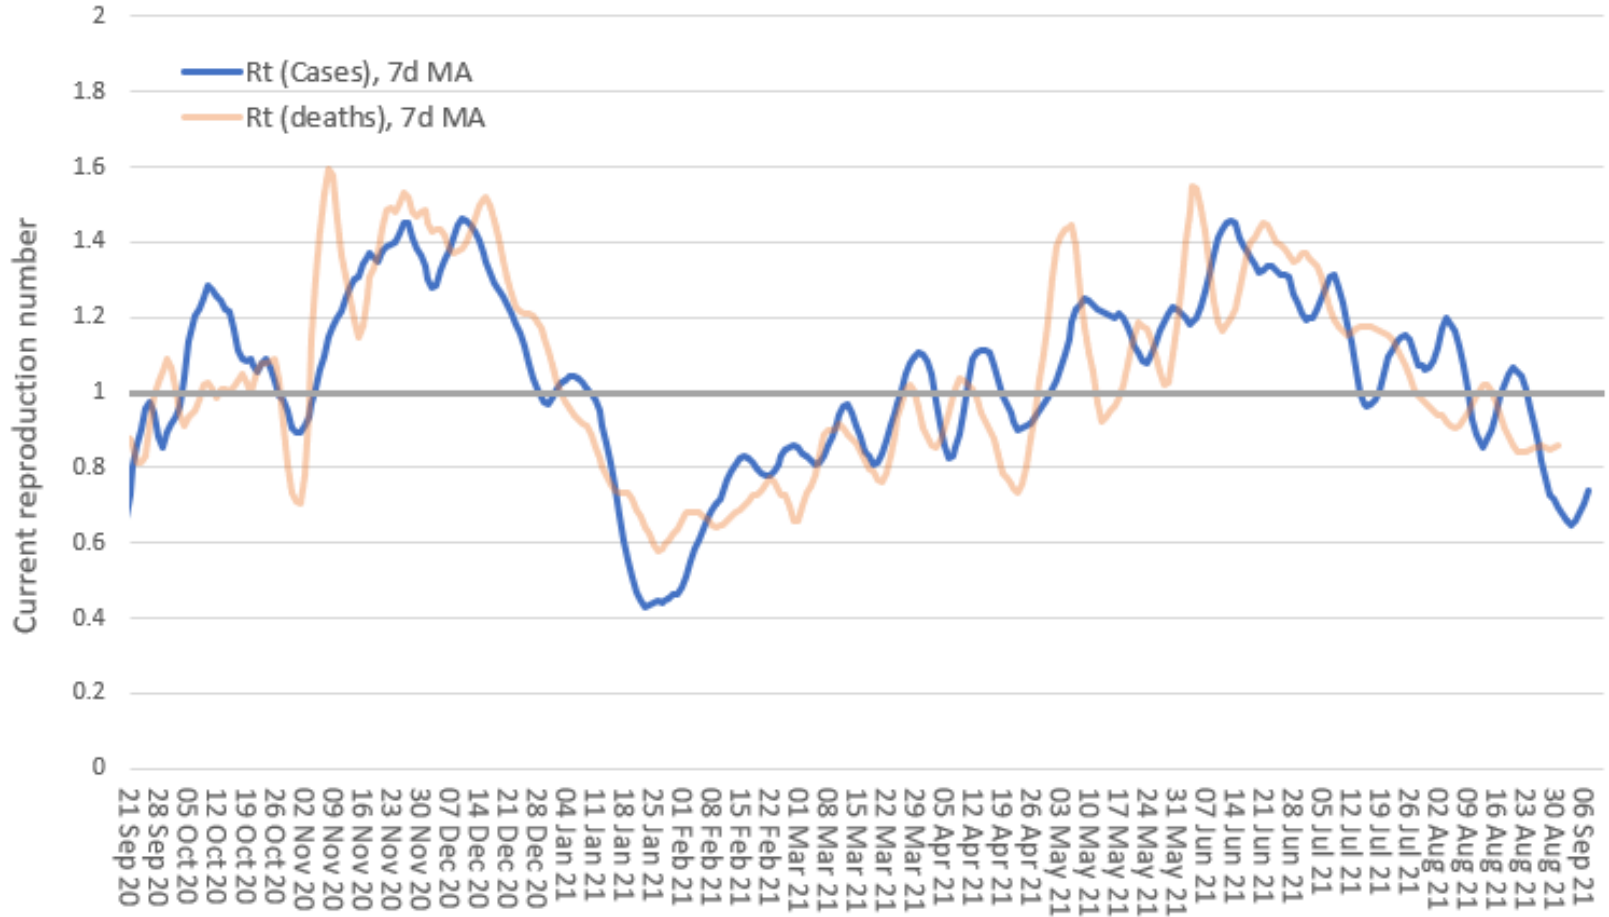

Surveillance & Response Update

Integrated testing, case, hospitalisation and mortality trends

Current reproduction number (Western Cape)

Reproduction number based on cases and deaths durably below 1.0

National trends

- Only Gauteng and Limpopo have exited their 3rd wave
- Other provinces remain in 3rd wave.
- Increases in EC, NC & FS.

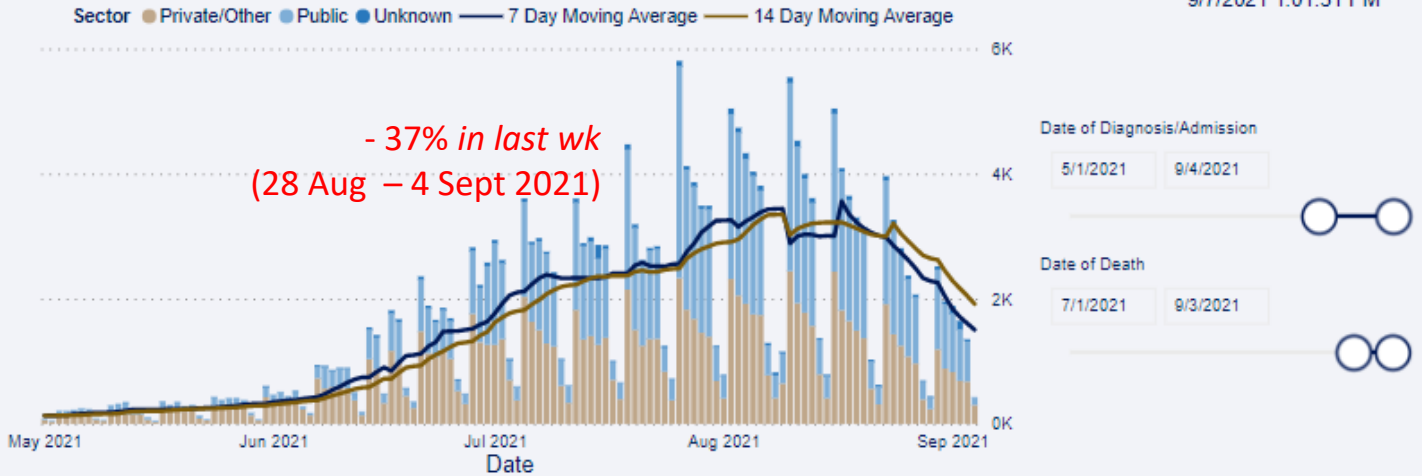

7-day moving average of new cases by province

Provincial Resurgence Overview

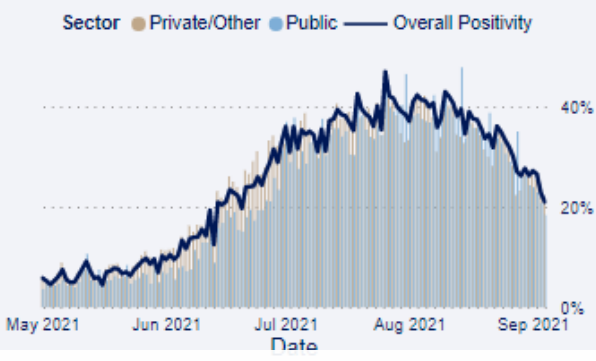

No. of Cases, 7 Day Moving Average and 14 Day Moving Average by Date and Sector

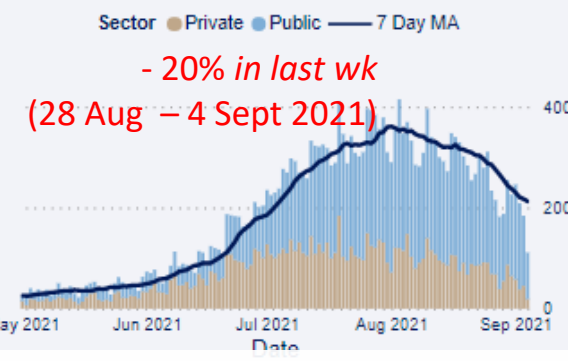

Select District, Subdistrict:

- ▼ Cape Winelands
- ▼ Central Karoo
- ▲ City of Cape Town
 - Eastern
 - Khayelitsha
 - Klipfontein
 - Mitchells Plain
 - Northern
 - Southern
 - Tygerberg
 - Western
- ▼ Garden Route
- ▼ Overberg
- ▼ West Coast

Proportion Positive and Overall Positivity by Date and Sector (*Provincial Only)

No. of New Admissions and 7 Day MA by Date and Sector

No. of Deaths and 7 Day MA by Date and Sector

Provincial Overview

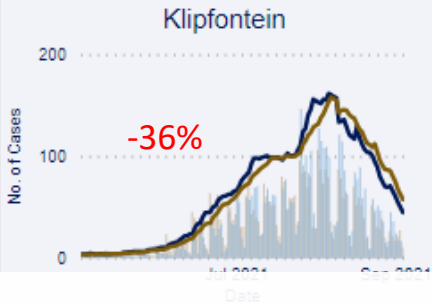

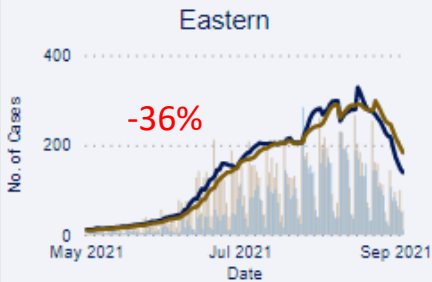

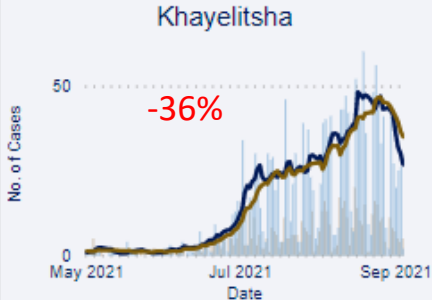

- Case numbers continue on the downward trend
- The **proportion positive** has also decreased to **21%**.
- We are currently seeing an **average of 1505 new diagnoses** each day.
- Admissions and deaths have started to decrease more steadily, with an average of **215 new admissions** and around **65 deaths each day**.
- **The province will only have exited the third wave once we reach a daily case load of ~530 cases a day**

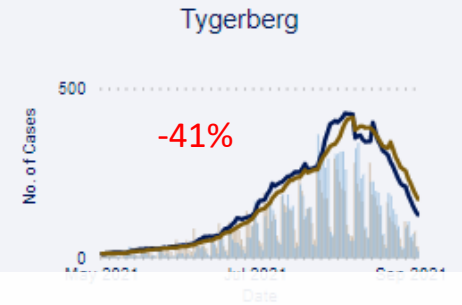

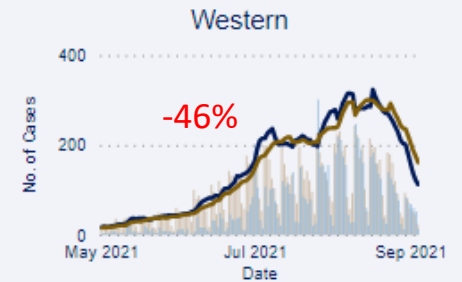

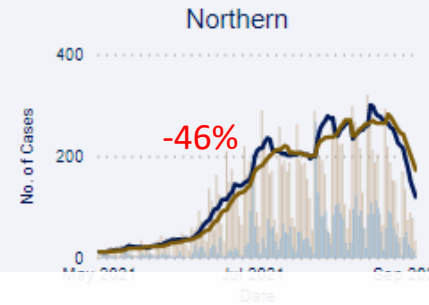

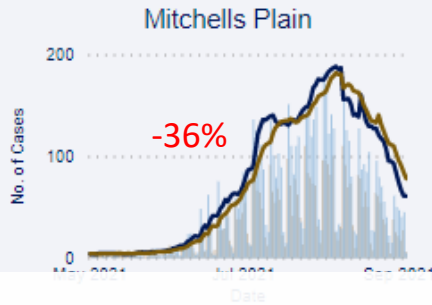

5/1/2021 9/4/2021

Metro Resurgence Overview

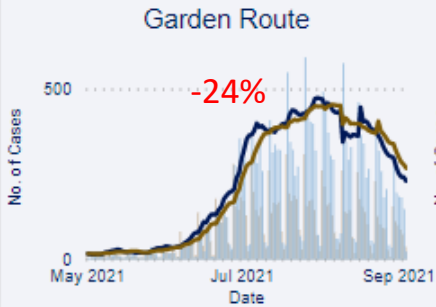

Metro Overview: No. of Cases with 7 and 14 Day MA by Date and by sector

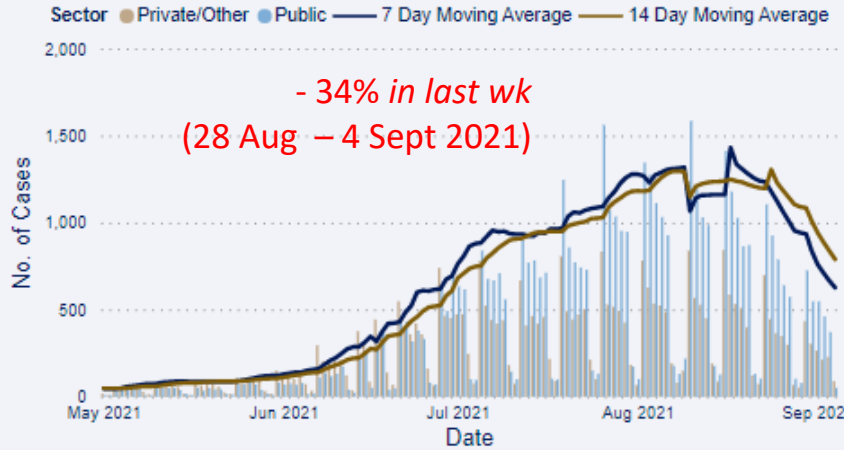

Metro Overview

- Overall, there is a **41% week on week decrease** in cases in the **Metro**.
- All subdistricts are now seeing significant decreases in weekly cases over the last week

Rural Resurgence Overview

Rural Overview: No. of Cases with 7 and 14 Day MA by Date and by sector

No. of Cases by Rural Subdistrict

District	Subdistrict	No. of Cases
Garden Route	George	11,423
Cape Winelands	Drakenstein	10,978
Garden Route	Mossel Bay	7,545
West Coast	Swartland	5,274
Cape Winelands	Stellenbosch	5,010
West Coast	Saldanha Bay	4,123
Overberg	Overstrand	4,026
Cape Winelands	Breede Valley	3,739
Overberg	Theewaterskloof	3,662
Garden Route	Oudtshoorn	3,484
Cape Winelands	Langeberg	3,281
Garden Route	Knysna	2,939
West Coast	Matzikama	2,896
Garden Route	Hessequa	2,724
West Coast	Bergrivier	2,718
Cape Winelands	Witzenberg	2,448
West Coast	Cederberg	2,008
Central Karoo	Beaufort West	1,924
Overberg	Swellendam	1,696
Overberg	Cape Agulhas	1,448
Garden Route	Bitou	1,221
Garden Route	Kannaland	785
Central Karoo	Prince Albert	444
Central Karoo	Laingsburg	283
Total		86,079

Rural Overview

- There is a similar decrease in case numbers across the rural districts

Expectations for the Third Wave & our triggered response

Short term predictions from SACMC – new cases

- Predicting far fewer cases for the next week.
- 20% probability that 3rd wave will be over by 18 September 2021

Black line:
previous cases

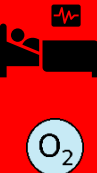

Grey line:
forecast for this week

Dots:
actual cases

Red line:
Prediction for next week

Western Cape 3rd wave – triggered response

Principle: Transparent pre-defined triggers for whole of society response to reduce transmission and prepare health services.

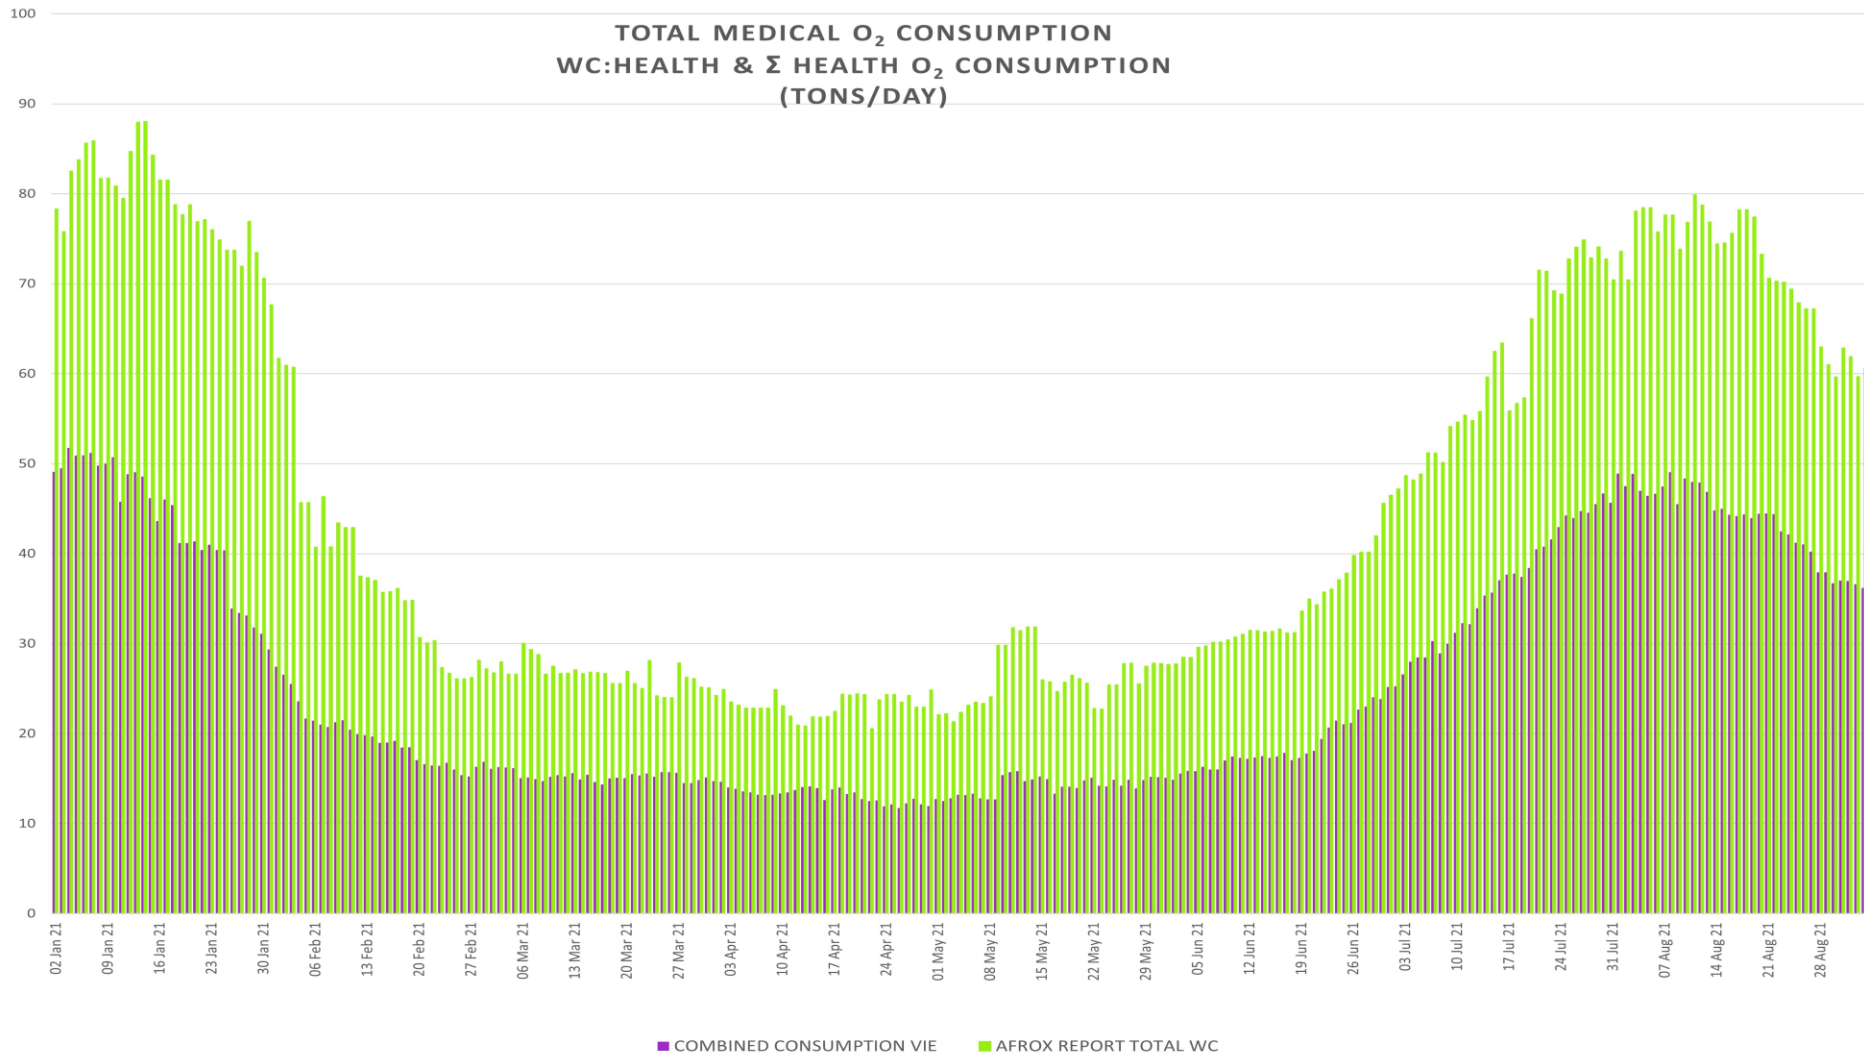

Indicator	Example of Resurgence Metric
First warning: ↑ health service demand in 14-21d	 <p>Large ↑ daily cases (increase for ≥ 1 week of ≥ 20%)</p> <p>Overall test positivity >7% for ≥1 week</p> <p>>15% of hospitals have >10% of beds occupied by COVID-19 patients</p> <p>>50% ↑ in pre-COVID-19 hospital O₂ use</p>
Second warning: ↑ health service demand in 7-14d	 <p>Overall test positivity 10-15% for ≥1 week</p> <p>>15% week-on-week increase in 7dma of current admissions</p> <p>>40% of hospitals have >10% of beds occupied by COVID-19 patients</p> <p>>75% ↑ in pre-COVID-19 hospital O₂ use</p>
Third warning: ↑ health service demand in 2-7d	 <p>>20% week-on-week increase in 7dma of current admissions (↓to -11.7%)</p> <p>>50% of hospitals have >20% of beds occupied by COVID-19 patients (49%)</p> <p>>50% of high care, intensive care & HFNO₂ COVID-19 beds occupied (85%)</p> <p>>100% ↑ in pre-COVID-19 hospital O₂ use (currently at 49T/day or >100%)</p>
Health service capacity threatened	 <p>>2800 current COVID-19 inpatients (currently at 2819 admissions)</p> <p>Note: This is across both public and private sector.</p> <p>>80% of high care, intensive care & HFNO₂ COVID-19 beds occupied (91%)</p> <p>>200% ↑ in pre-COVID-19 hospital O₂ use (currently at 36T/day or ~ 195%)</p>

Acute service platform – current picture

2690 beds
provisioned

1. Currently **2 819 COVID patients** in our acute hospitals (**1 568** in **public** hospitals & **1 251** in **private** hospitals). This **excludes PUIs** and **cases in specialised hospital** settings.
2. The **Metro hospitals** have an average **BOR of 92%**; **George** drainage area hospitals at **64%**; **Paarl** drainage area hospitals at **78%** & **Worcester** drainage area hospitals at **71 %**. **Critical care BOR for the province at 91 %**.
3. **COVID & PUI cases** currently make up **22%** of all available acute general hospital capacity in both Metro and Rural Regional Hospital drainage areas.
4. **COVID inter-mediate care** – the **Brackengate Hospital of Hope** currently has **192 patients (57.14 % BOR)**, **Mitchell Plain Hospital of Hope** has **97 clients (62.9 % BOR)** and **Sonstraal** currently has **51 clients (85%)**; **Freesia & Ward 99** have **0 patients**
5. The Metro **mass fatality centre** has capacity for **240 bodies**; currently **18 decedents (cumulative total of 2 070 bodies)** admitted. The overall capacity has been successfully managed across the province and the TMFC will close on the **30th September**.

W Cape total oxygen consumption

Preparing and Caring for our People – 3rd Wave

5

Safeguard & protect
the well-being of
health care workers

Workforce Planning:

- Currently, appointed **842** staff additional for COVID
- Appointed **1449 HCW and support staff** which includes **587 interns** for the Vaccination Drive
- **Contract extensions** until end of Sept and Dec to ensure continued staff capacity on the health platform (in anticipation of the 4th wave).
- A total of **772 applicants** can still be appointed, if needed

Vaccination Training:

- **6278** registered vaccinators on health platform
- **4177** trained vaccinators to date

32 new registered vaccinators

12 additionally trained vaccinators

Well-being and Safety:

- **Proactive Engagements with staff to increase Vaccination Coverage amongst HCW.**
- Increased advocacy and **activation of Onsite Counselling Clinics** (Employee Wellbeing Programme)
- **PPE provision and improving OHS Practices**
- Staff Fatigue – **encouraging rest & reset (leave provisions)**
- Internal Health Comms Series and Staff Wellbeing to build up resilience and hope (**Financial Wellbeing and Mental Wellbeing as key focus areas**)

2 914 434			2 065 372

16 April 2021	Registration opens for 60 Years +
01 July 2021	Registration opens for 50 – 59 Years
15 July 2021	Registration opens for 35 – 49 Years
20 August 2021	Registration opens for 18 Years +

Phase 2

- Persons older than 60 years
- At risk workers
- Clients in congregate settings
- 35 – 59 Years

Phase 3

Updated W Cape Public Sector Vaccine Supply Pipeline

Up to 08 September 2021, the public sector has received **2 437 240** vaccine doses:

- 2 112 510 Pfizer doses
- 324 730 J&J doses

Vaccines Administered

Proportion Vaccines Administered: Public and Private Sectors

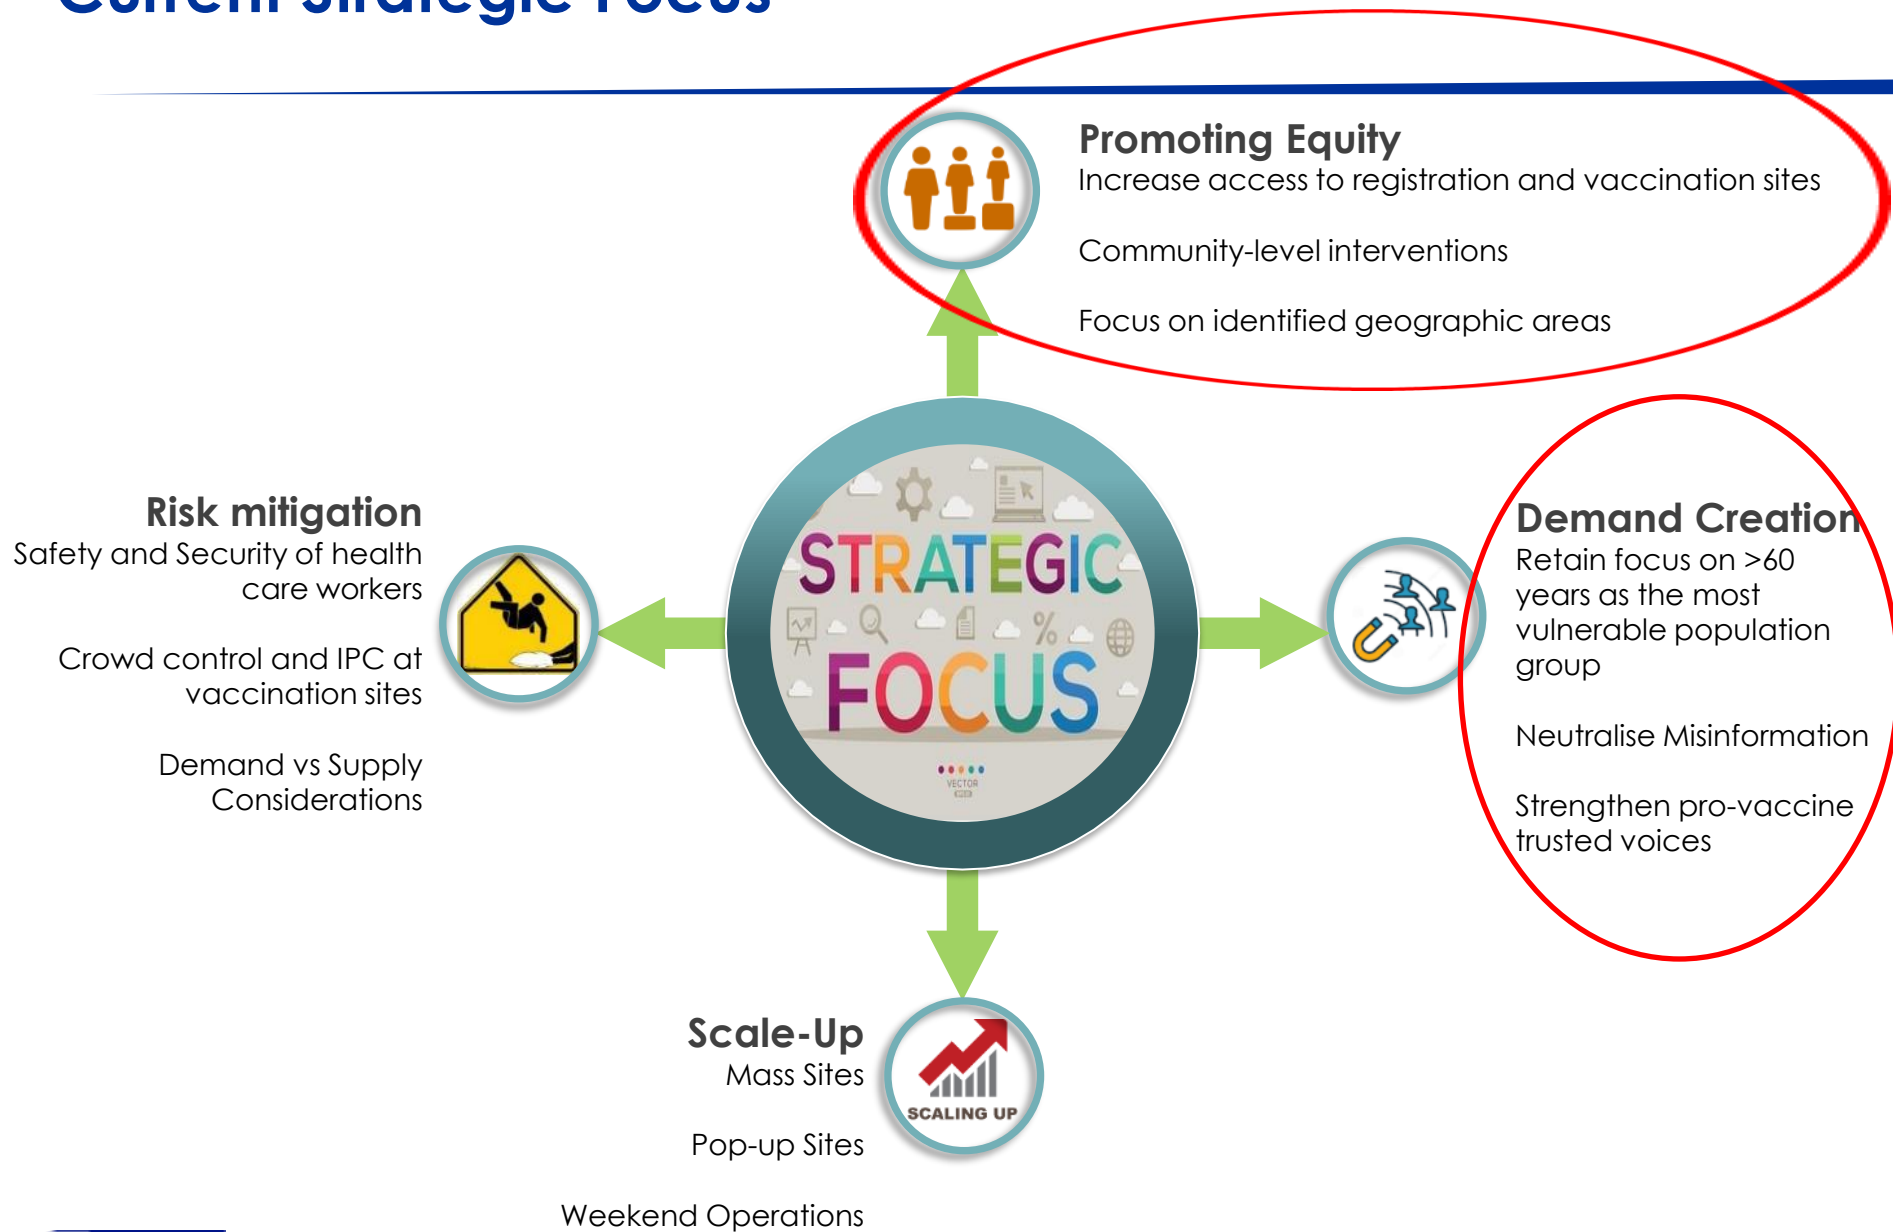

Cumulative Total Recorded on EVDS on 08 September 2021 = 2 325 125

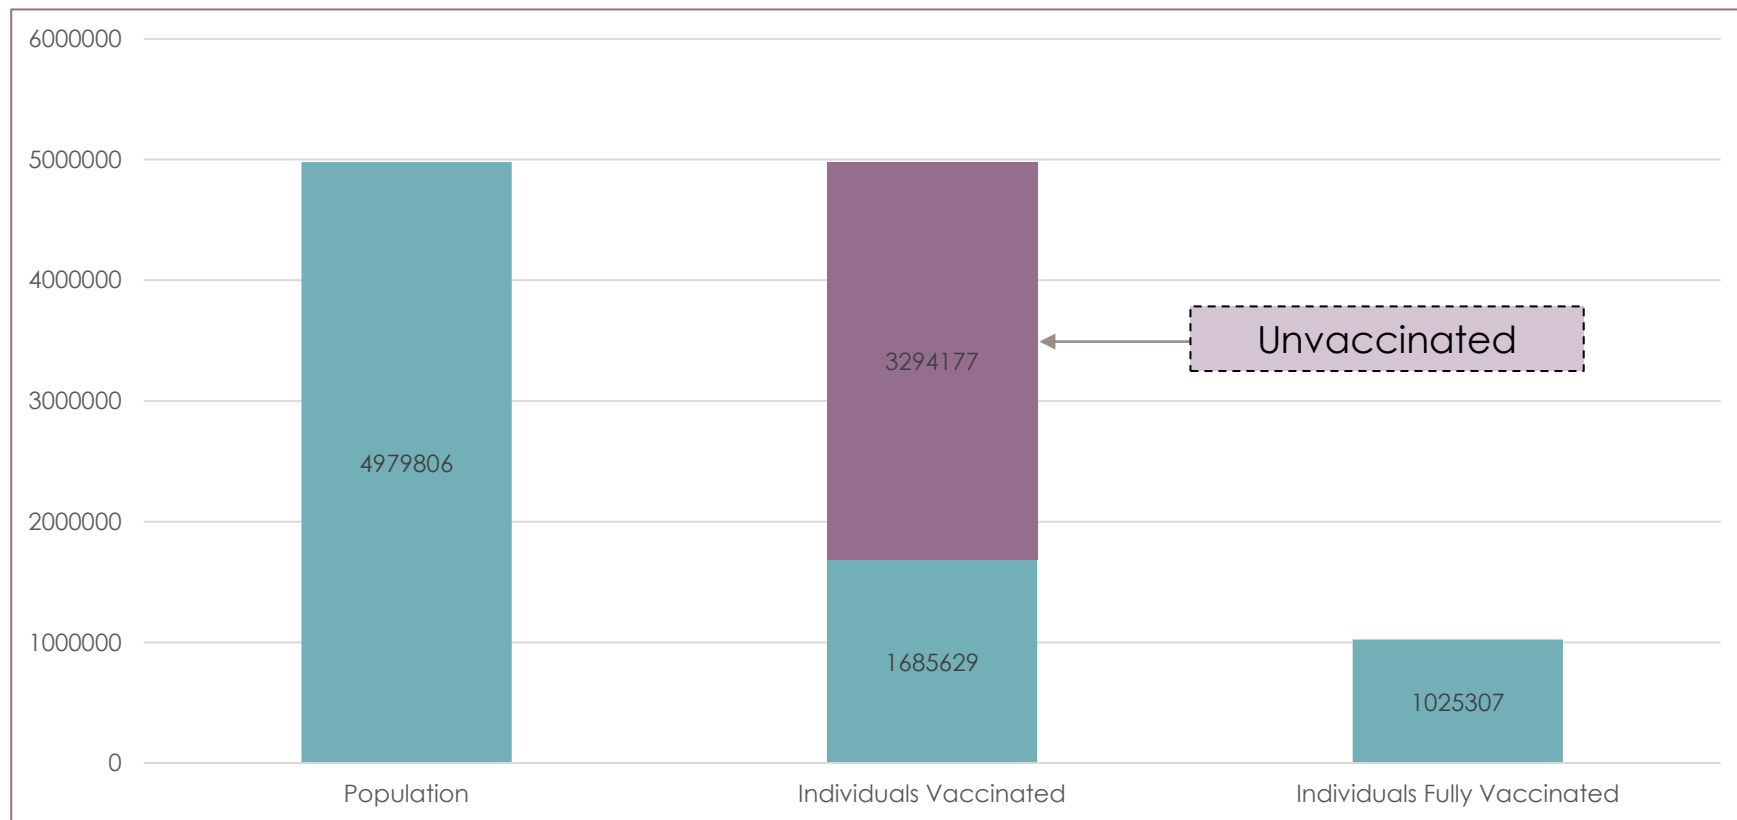

Source: NDoH Dashboard ([Microsoft Power BI](#)) accessed on 08 September 2021 @18:50

[Disclaimer: Data displayed in these graphs and tables only contains records captured on EVDS. Totals will be adjusted as back-capturing and data validation is done.]

Current Strategic Focus

Going Forward

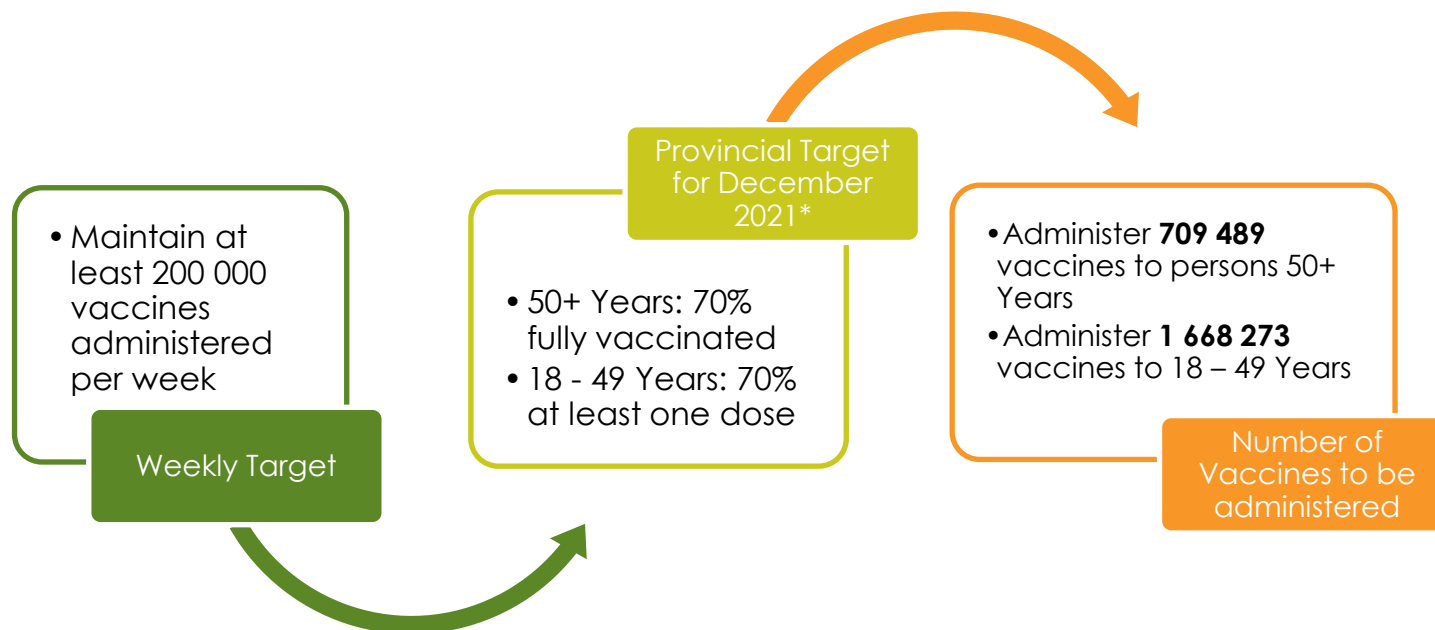

As on 08 September 2021:

Total number of individuals vaccinated = 1 685 629 = **33.87 %** of > 18s (EVDS)

Number of unvaccinated persons aged 18 years and older = **3 294 177**

Provincial Targets up to December 2021

Age in years	Total Population	Proportion Vaccinated (At least one dose of two-dose regimen received) as on 06 September 2021	Proportion Fully Vaccinated (Received either 1 dose J&J or 2-dose Pfizer) as on 06 September 2021
60+	719 702	64%	55%
50 – 59	682 550	49%	34%
18 - 49	3 577 554	23%	10%

-  = 10,000 fully vaccinated* in population
-  = 5 unvaccinated* cases/admissions/deaths
-  = 5 fully vaccinated* cases/admissions/deaths

Data for cases diagnosed in week of 14-20 August 2021

*Fully vaccinated = ≥14 days post 2nd Pfizer OR ≥28 days post J&J

*Unvaccinated includes partially vaccinated

Limited to population age 60 years+ with highest vaccine coverage

Vaccine coverage determined from demographic estimates & EVDS data. COVID-19 cases, admissions & deaths determined from integrated provincial health clinical information systems. As vaccine coverage increases, absolute numbers of COVID-19 cases, admissions & deaths will drop, but we expect proportion vaccinated to increase due to higher vaccine coverage.

Communications

Keeping Safe Messaging

Stay Safe with your family and friends

STAY SAFE
MOVE FORWARD

We must all stand together to beat the third wave of the coronavirus. We can do this by understanding how coronavirus spreads and keeping up our good habits.

- Coronavirus spreads through the air when people breathe, talk, cough, sing or shout.
- It spreads quickly during waves that last several months.

We can protect ourselves by:

- Keeping gatherings small, short and outdoors.
- Making sure we have as much fresh air as possible indoors.
- Wearing our masks when with others or leaving the house.

Mask up!

- A 3-layer cloth mask halves the amount of coronavirus you breathe in.
- Masks protect you and the other person - it shows you care.

Stay home for 10 days and test if you develop coronavirus symptoms:

- Cough
- Sore throat
- Fever
- Loss of smell or taste
- Body aches

Try to stay separate from others in your home. If you can't, wear a mask and open doors and windows.

Go to hospital immediately if you develop:

- Difficulty breathing
- Chest pain or pressure that won't go away
- Confusion
- Can't wake up completely

MAKE SAFER CHOICES

We're all eager to get back to our pre-Covid-19 lives. Managing the risks can help us get there faster.

Fresher is better! Ask to be seated outside if you're eating out.

Addressing misinformation

COVID-19 VACCINES DEBUNKING THE MYTHS

FALSE ❌

The vaccine was rushed and is not safe

It changes your DNA

The vaccine can give you COVID-19

It causes severe side effects or death

It can make women infertile

FACT ✅

Expert researchers across the world worked together and took no safety shortcuts. Existing safe technology was used to create the vaccine. Over 1.84 billion people worldwide have already been safely vaccinated.

It is impossible for the vaccine to change your DNA. The vaccine does not remain in your body but gets broken down and discarded by your body.

It is impossible. It does not contain live COVID-19 virus.

Side effects like headache, a sore arm, feeling tired, or mild flu symptoms are normal. This means the vaccine is working and your body's immune system is responding by making antibodies.

There is no evidence that the vaccine causes infertility or any other long-term side effects.

Everyone over 18 can go to the nearest vaccination site to register and get their vaccine. Bring an unvaccinated family member with you.

Do you have high blood pressure or diabetes? The vaccine is safe for people with high blood pressure and diabetes. Get vaccinated immediately to protect yourself against getting severe COVID-19.

Vaccination certification

7 September 2021

Seeking official vaccination certification letter for exceptional circumstances (additional to vaccination card and SMS proof)?

1. Send email to dohvaccination.support@westerncape.gov.za with written verification from travel agent/embassy that it is a travel requirement.
2. Your travel agent/embassy should also advise if this letter is adequate for the country of travel.
3. Follow the instructions on the reply-email.

- *Only urgent and exceptional circumstances will be considered (travel for work or study purpose, medical or compassionate reasons).*
- *Turnaround time is five working days.*
- *Non-exceptional applications will not be considered (e.g., leisure travel, lost vaccination cards, back-up to vaccination cards, etc.)*
- *This service is only available to persons who were vaccinated in the Western Cape.*

Athlone drive-through

 Shana Jabaar brought all three her kids to get vaccinated at the Athlone stadium drive-through.

 Calling on all men and women! Athlone Vaccination Centre of Hope's Drive-through service, located at the Athlone Stadium, is now open!

Monday - Friday | 8:30 - 4pm

 The Simon's family bubble, all came for their vaccine at the Athlone Vaccination Centre of Hope's drive-through and brought their 80 year old grandmother to get her 2nd jab.

Conclusions

Concluding remarks

1. We have now passed **the peak of 3rd wave** with **signs of continuous decline**, but urge everyone to **adhere strictly to protective behaviours, to contain** it over **the coming weeks**.
2. We have **tailored our response to the 3rd wave**, with **clearly identified trigger points** for an **appropriate health platform and societal response**.
3. We continue to require **a concerted whole of government and whole of society response** to **flatten the 3rd wave**, to protect the health system.
4. We have **scaled up** our **vaccination capacity** to **administer vaccines**. We have the capacity **to vaccinate >50 000 people/day**. Vaccine effectiveness has been clearly demonstrated
5. We need to scale our **mobilisation and assist everyone >18 years** to be **registered on the EVDS**, and **to be vaccinated**. **Lets all be vaccine ambassadors.**

Thank you
